

App List-Straight from a SLP's iPad!

By Amanda Schaumburg M.S. CCC-SLP

These apps are therapy tested and approved by me!

This list is strictly what is on my iPad/iPhone, not a comprehensive list. To find these apps search the app name or developer name in the App Store. I primarily use my iPad for therapy, please check iTunes for iPod/iPhone compatibility. Please note prices are subject to change per developer!

Articulation/Phonology

These apps are designed to help students who struggle with speech sounds disorders/delays. Most of these apps were created by Speech Language Pathologists. These are my most frequently used articulation apps! Quite a variety of fun activities to keep your students interested in articulation!

Articulation Station by Little Bee Speech. \$49.99 (FREE w/ one deck). Full Artic App with many features. Store and track student data, add multiple phonemes to a goal, and 3 modes of play (words, sentences, stories) The stories have 2 levels with pictures and text. The word level has flashcards and a matching game. Very thorough app! Cute design! A "go-to" app!!!

Articulation Game board::Common Sounds by Speech with Milo: \$5.99. A fun new way to practice artic! Included sounds: /F/, /V/, /K/, /G/, /S/, /Z/, /CH/, /SH/. Initial, medial, and final positions for each sound. Game is played like a traditional game board on the iPad! Store and track data on multiple students!

Articulate it! by Smarty Ears: \$38.99 Articulation flash card app that is very versatile. Ability to do group therapy with tailored targets for each child. Ability to record sessions and drill at word and phrase level. Great data recording/reporting options. Very nice graphics and layout! This is a must have!

Match2Say by Smarty Ears: \$19.99 A fun matching game for articulation practice. Individual and group play settings with the ability to pick target phonemes and placement. The game keeps tracks of matches with little stars by the students name (they love that!).

Pocket Artic by Pocket SLP: \$29.99 Articulation flash card app with it all! Great data collection and report options. Ability to store child's targets and do group therapy sessions. Nice crisp presentation without a lot of background distractions. My older kids love this one.

Webber Articulation Castle by Super Duper Publications \$39.99. This is a great app that contains 8 different games (flashcards, matching, and arcade games) to work on phonemes in all position of words! Practice sounds at the word/phrase/sentence level and have fun! Data tracking! A must have!

Articulation Flip Books by Mayer Johnson: Free with add on Packs. This app is just like their flipbooks. It comes with "ar" book and you can buy additional books for \$9.99. Great for practicing target sounds at the phrase/sentence level. My students love to flip the pages!

Articulation Games by Virtual Speech Center \$34.99. This app takes your traditional flashcard app a step further! Kids get to spin, pull a lever, or play a matching game while practicing artic! Practice sounds in all positions and levels (word/phrase/sentence). Recording and data tracking included as well as bonus animations!

Articulation Scenes by Smarty Ears! \$29.99 This is a new favorite! It comes with 72 scenes for all the phonemes and positions (including blends!). You can play a "find it" game or "touch & say" game! You can read scripts for reading practice or make your own stories for spontaneous practice! MUST HAVE!!!!

Vocalic R Shuffle by Linguisystems: \$24.99 Flashcard app with over 300 pictures to target vocalic r types. This one is pricey for me since it's a flashcard app, but it's well made. "Touch It" and "Say It" activities included.

R Intensive by Smarty Ears \$19.99 This is an app that focuses on the /r/ phoneme (pre-vocalic, or, ire, are, ear, er, rl) in 3 formats (flashcards, matching, guessing game). Great data tracking. The guessing game is amazing!!!! Great for kids with articulation and language goals!

Speech Tutor by Pocket SLP: \$9.99 This app is a great tool to show a 3D perspective (front and side views) of phonemes. Allows you to see inside of the mouth and gives a great visual representation of what the tongue and articulators are doing while we are saying sounds.

Minimal Pairs by SLP TechTools \$29.99 A great tool to work on the common phonological processes. 3 practice formats: auditory discrimination, contrast drill, and repetition drill. This one is different because all of the data tracking tools are away from the child (at the top of the screen facing the therapist). Complete progress monitoring and reporting. Amazing app!

ICanArticulate by Express SLP \$39.99 (free version with /k/ sound only). This app is a more simple flashcard app for those of you who may not like the more kid friendly apps with games or animations. Easy to use and the ability to create instructor profiles.

Minimal Pairs Academy by Smarty Ears \$29.99. This phonology app is kid friendly with a cute theme and animations. Same Smarty Ears data/progress monitoring with the ability to add pictures/avatars for each student (tailored goals). This one is neat because you can mark a goal mastered when the student masters it! 4 modes (auditory bombardment, auditory discrimination, practice, and phrase completion).

Pocket Pairs by Pocket SLP: \$24.99 Minimal pairs app with individual/group sessions and the ability to customize each client's profile to their specific processes. The cards display the child's name which is great motivation! Great data collection and reports!

Phonology Pairs by Linguisystems: \$24.99 This app develops two major skill areas: auditory discrimination and speech sound production. Targets six major processes: initial/final consonant deletion, velar fronting, cluster reduction, gliding, and stopping. Data tracking included!

Minimal Pairs by Learning Fundamentals LLC \$9.99. This app is an auditory discrimination activity to help children learn how word s can differ by one sound. This app focuses on initial /final consonant deletion and initial /s/ clusters. Tracks data and you can record responses.

More Articulation Apps on my iPad **ArtixPix** by RinnApps 29.99 (or free version with add on packs \$2-4.00 each) I have many SLP friends that use this app, I have the free version with the /l/ phoneme and use it from time to time when my students need a change. I don't personally like the illustrations, I prefer real pictures on my flashcards. **Phonics Genius** by Innovative Mobile Apps: Free I use this because it allows you to choose a target sound and it generates a lot of word only flashcards (great for older kids). **Tongue Twisters Pro** by Noel Keshwar: Free Fun app to use when you are working on phrases/sentences. **Talking apps (Larry/Tom/T-Rex/ ect..)** by Outfit 7 Ltd: Free-\$2.99 These apps repeat back what you say in a funny voice and the kids love to practice artic this way! They also come with other fun features that help with motivation and language! **Quick Artic** by Virtual Speech Center FREE when you sign up on their website! Flashcards. **Spanish Artix** by Smarty Ears \$19.99 Great for your bilingual kids! **Speech Trainer 3D** by Smarty Ears \$7.99 Provides a 3D model of all of the sounds in the English language! **All About Sounds** by Advance Games: \$0.99 An affordable matching game to work on initial sounds.

Speech Trainer Spanish Artix

Language/ Vocabulary Development

Kindergarten.com ABA Apps

What Does Not Belong, What Goes Together, and Receptive Identification combined.

\$1.99each These apps target problem solving skills and general receptive identification skills. Easy to use touch response app with great feedback. They recently added data tracking to some of their apps!

Language Adventures by Smarty Ears \$19.99 This is a virtual game board that targets synonyms, antonyms, inferencing, categories, and multiple meaning words. 3 different game boards (can be used elementary-high school). This is a must have! Store student data and track progress!

Category Carousel by Pocket SLP \$9.99 A fun way to increase and enhance a child's vocabulary. You can categorize and subcategorize pictures to build, store, and retrieve words leading to better comprehension and expressive language skills! Cute and fun design !

Fun and Functional by Smarty Ears \$9.99. This app is designed to improve language comprehension and expression in all age groups using real-word objects. You can modify the number of stimuli presented and it gives you the session report at the end. Receptive task: The student is presented with a number of items and has to touch the one described. Expressive task: They are shown a picture and have to describe it's function. Love this!

Go-Togethers by Smarty Ears \$9.99. This app is designed to increase expressive/receptive language skills by targeting semantic associations. Develop vocabulary, naming, and categorization skills with this fun app! Touch and drag all the things that go-together!

Language Forest by PocketSLP \$24.99. This is a very comprehensive flashcard app that comes with a variety of packs that cover many different language topics (WH questions, verbs, associations, categories, describing, emotions, functions, guess the word, if...then statements, naming, synonyms, adjectives, and more!). Import your own images and create personalized decks for your students! Great data tracking and report features! You can do group therapy with tailored targets for each student.

iSpot Pro for Kids By Mayuir Sidhpara \$1.99 Cute app to work on language skills by spotting differences in scenes. This app uses real life scenarios for optimal language learning! Have students explain the differences! Fun!

Language Expansion

First Phrases HD by Hamaguchi Apps \$9.99 This app helps build 2-4 word phrasing in language delayed kiddos. It has animations that go along with the phrases (after you present the target phrase the student can touch each word to hear it, and then get a chance to record themselves imitating the phrase, after they hear their voice it animates the phrase!) Kids really love this!

Picture the Sentence HD by Hamaguchi apps \$9.99 This app is great for sentence comprehension. It offers three different levels of difficulty so the child can learn how to attend to important elements of a sentence and "picture it," attaching meaning to the words and eventually forming mental pictures without visual support.

Language Empires by Smarty Ears \$29.99 This app was designed by SLPs for elementary aged students who need help in the following areas: answering why, which, and how questions, predicting, figurative language, inferencing, vocabulary, and sequencing skills. It is set up in an ancient civilization theme where students can visit civilizations to work on skills! I like this app because it turns language therapy into a fun and engaging activity where students get to explore different worlds and collect treasures from each! Individual or group sessions and great data tracking and reporting!!

Multiple Meanings Library by Virtual Speech Center. \$12.99 This app offers 4 different modes to learn: Auditory Bombardment, Fill-In, Make Up sentences, and picture identification.

Tell me About it by Different Roads to Learning LLC \$9.99. This app teaches language through receptive features (function, label, category). Earn stickers and watch a short animation for rewards!

First Word International Pro by Hamaguchi Apps. \$9.99 A great way to work on basic vocabulary skills. It comes in 7 languages! The child is bombarded with an object auditorily and visually and then they are asked to find it and name it. Great resource!

DESCRIBE IT by Pocket SLP \$9.99. This app gives students the framework by giving cues in seven of the most important parameters for describing: taste, touch, function, sight, hearing, smell, and category. It comes with two games to help generalize learning: "Pass It" and "Guess It". Fun to use and a great tool to have!!

Category Learning Center by Smarty Ears \$9.99. This is a great app to help visualize categorizing. 4 modes: Sort it, Where Does it Belong, Category Naming, Category Selection. Multiplayer and multi-level game.

Draw&Tell by Duck Duck Moose \$1.99. A fun, creative drawing app that allows you to record a story about your drawings! Draw and then talk about it! Perfect for speech!

Speak Colors by RHW Technology :Free (Pro Version for \$3.99) This app is designed to encourage young children to imitate and use two word phrases with color words and common objects. Simple and affordable!

Language Builder by Mobile Education Store:\$7.99 This app helps elementary aged kids improve receptive and expressive language skills with a variety stimuli, all real photos of people doing different activities. This app has the ability to record a student's responses and data tracking!

Itsy Bitsy Spider, Old MacDonald, BusHD, Fish School by Duck Duck Moose: iPad \$1.99 iPod \$0.99. Great apps to get those toddlers giggling and talking!!

Grammar/Parts of Speech

iPractice Verbs By Smarty Ears: \$10.99 This app is great for targeting regular and irregular verb tenses at the word, phrase, and sentence level. This is a flashcard app and it has both receptive (find the verb named) and expressive tasks (the students are asked to say the verb described in the picture).

Preposition Pets by Zorten \$1.99 Cute matching game that targets prepositions. Pick which prepositions you want presented in each session.

Plurality by Zorten \$1.99 Another matching game that targets plurals!

Expedition Plurals by Virtual Speech Center. \$3.99. Target irregular and regular plurals with this space adventure game. 5 Different modes of play to learn plurals.

Zombie Grammar Force by Brian West: \$0.99 This is a great grammar game for parts of speech. You have identify nouns, adjectives, interjections, conjunctions, verbs, and adverbs correctly. The students get to fire cannons at enemy ships and collect money. Simple data calculations. This is for older students (middle-high school).

Mad Libs by Penguin Group USA: Free and **Word Ventures** by In A DY Development Free. These apps are great to work on identifying different parts of speech (nouns, verbs forms, adjectives, adverbs, exclamations, ect...) It is just like the original books you can buy but digital! Email-able stories!

Grammar App by Tap to Learn: \$0.99 Great way to learn and test basic grammar skills. This app goes along with Grammar Games which is \$1.99 (a more game like approach to learn the skills).

Verb News by Virtual Speech Center. Practice Verb tenses while being a news caster! This app takes a video of the student practicing verbs (in a news reporter format!) One of a kind!!

Birds on a Wire: Adjectives/Verbs/Nouns by Electrokite \$.99 Learn to identify parts of speech with these cute apps!

Grammar Jammers By Pearson Education INC: Free Cute App that uses musical rhymes to learn basic grammar usage. I like it because it has little quizzes that unlock the next level. Also available in Middle School Edition. I really like using this as a warm up when working on grammar skills.

Preposition Remix By Smarty Ears: \$9.99 This is a fun way to learn and practice prepositions. This is a touch response app that tracks percentage of accuracy. The student will hear a prepositional phrase and touch the correct picture. You can customize in settings to have written cues presented and questions repeated.

Tense Builder by Mobile Education Store \$19.99. This is my favorite MES app! This app gives a visual representation through images and animations of verbs in present, past, and future tenses. Different levels for different students! Track data and record the student practicing the verb tenses! The animations are hilarious!!

Preposition Builder by Mobile Education Store. \$7.99 Great way to work on prepositions! Same MES format!

Irregular Verbs, by AbiTalk \$1.99 This is a fill in the blank type of format for irregular and regular verbs. You drag the correct verb into the sentence. It is has great visual and auditory cues. It keeps track of correct and incorrect responses. AbiTalk has many apps on a variety of concepts!

Adjective Remix by Smarty Ears \$9.99. Great way to reinforce descriptive vocabulary in a receptive identification format! (Child hears adjectives and then they choose the corresponding picture). Great data tracking!

Speech with Milo: Nouns, Adjectives, Verbs by Doonan Speech Therapy Apps \$2.99 each. These apps feature a cute mouse that gives them a visual representation of the target word (animation). The noun app uses the camera to place the student's lie image in the app. My preschool kids loves these apps!

Also check out Super Duper Card Decks: **Irregular Verbs Fun Deck, Using I and Me** \$3.99each

Sentence Builder/Rainbow Sentences By Mobile Education Store: \$5.99-\$9.99 These apps are

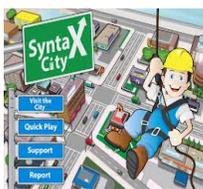

designed to help elementary age kids build grammatically correct sentences and improve syntax. There are different levels and customizable settings to match your students' needs in each of their apps. They include funny little animations when the students responds correctly. Rainbow sentences is neat because it color coordinates the words and the students work to complete a puzzle throughout the app.

Sentence Maker \$.99 by Grasshopper Apps and **Sentence Magic** FREE by Preschool University. These are affordable apps that help students construct sentences and identify words, capital letters, and punctuations.

Syntax/Sentence Construction

Syntax City by Smarty Ears \$24.99. This is another unique app that lets children explore different parts of "syntax city" to target different skills. This app targets: third person singular agreement, was/were, has/have, is/are, he/she, regular/irregular plurals. Data tracking and multi-player capable!!

Sentence Workout by Virtual Speech Center \$12.99 This app is designed for elementary age students to practice sentence construction. There are two modes: "Say It" and "Build Your Sentence." Hard work is rewarded with a soccer game!

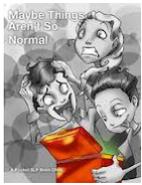

Sentences k-2 by AbiTalk \$2.99 This app has you place words in the correct order to make sentences. Simple and easy to use.

Reading/Comprehension/Narrative Skills

Pocket Lexi by Pocket SLP: FREE A language book that concentrates on figurative language, word replacements, and reading comprehension. Keeps track of responses and has a quiz at the end. Other books are available for purchase! Love this! :) I have purchased the in-app books purchases (\$7.99) worth every penny!

Maybe Things Aren't So Normal iBook by Pocket SLP This book is available through Apple's free app iBooks. This is an interactive iBook focusing on absurdities while practicing inferences, associations, and characteristics. Provides great artic practice throughout for s, z, and r sounds too! This iBook has videos and is packed with amazing facts about our world! Neat!

Story Pals by Eric Sailors. \$19.99 This is a story comprehension app that features narrated stories with quizzes following. You can select each student and customize the type of questions presented. The illustrations have cute animations to keep the student engaged.

Reading Rehab. Toolbox by Smarty Ears \$9.99 Targets improving reading skills for adults with reading difficulties. The Reading Rehabilitation Toolkit integrates six state-of-the-art reading activities at the word and phrase levels all specifically crafted to promote success in reading rehabilita-

StoryBuddy by TapFuze \$4.99 **My Story** by HiDef Web Solutions \$1.99, **StoryPatch** by Haywood Soft LLC \$2.99 and **Super Duper Story Maker** by Super Duper \$4.99 More great app to let your students be creative and make their own stories. Each has its own neat elements!

Story Builder by Mobile Education Store.\$7.99 Improve paragraph formation and improve integration of ideas. This app walks your students through the story building process.

Toontastic by Launchpad Toys FREE. This app is designed to master the concept of story arcs (introduction, problem, climax, resolution ect..). This can help students build their narrative and creative writing skills. After they create the cartoon you can have them write the script or story out on paper.

Surprise Pro by Hamaguchi apps! \$9.99 This app is an animated story that has no words, you become the storyteller! Your students can practice their narrative skills by making up the words and recording their own versions of the story.

Reading Comprehension Camp by Smarty Ears \$19.99 (intro price). This app contains many stories on different levels! Each story has a quiz with customizable questions to work on wh questions, inferencing, compare/contrast and many more! (11 question types included!) You can even create your own stories!! This app is one of a kind !! Add this to your must have list!! Compatible with Therapy Report Center (see handy tools page for more info!)

Scribble Press by Scribble Press \$3.99 This app in unique because after you create a story with many different tools to write and illustrate you can download the book to iBooks and share! You can even order a paper copy of your book! They have pre-made templates or create your own!

Listening/Following Directions

Auditory Workout and **Auditory Processing Studio** by Virtual Speech Center \$19.99/\$29.99 *Auditory Workout* is designed for ages 4-10 who exhibit auditory processing, expressive language, or receptive language difficulties. This app is research based and focuses on improving auditory attention, memory, and auditory processing skills. Cute little rewards (shoot the basketball) throughout. There are 4 categories: Basic Directions, Quantitative/Spatial, Temporal, and Conditional. Store and track multiple users! *Auditory Processing Studio* is designed for kids 7yrs & up and implements the bottom-top approach to treatment of auditory processing disorders and focuses on improving auditory processing through auditory discrimination, auditory closure, and phonological awareness activities You can present the tasks with background noise (such as classroom) in both apps.

One Step Two Step by Pocket SLP \$4.99 This app is a coloring game that has 1-2 step commands (color the tiger's tail orange and a big leaf green). You can track response and monitor progress. Two levels of play. Kids love this one!!

Let's Talk Following Instructions by Let's Talk Apps \$1.99 Simple following one step game through receptive identification of common objects and their features. Cute design and easy to use and set up.

Spingo's Language Universe by Talking Wizard: \$2.99. A fun game to learn listening and language skills. A concept is presented and the child has to pick the correct picture. They are rewarded with puzzles and animations throughout the app! There are setting to adjust the level for each client.

Fun with Directions HD by Hamaguchi Apps: \$9.99 This app is a touch response game that works on listening, following directions, colors, spatial concepts, auditory memory, and auditory processing. It also has a recorder to use during expressive tasks. This is cute and simple with data tracking capabilities. Great App!

More Fun with Directions HD by Hamaguchi Apps: \$9.99. This app is similar to the original Fun with Directions app but has a focus on these 12 concepts: turn on/turn off; up/down, front/behind, on/under, put in/take out, above/below. Another great app by Hamaguchi Apps!

Let's Do Basic Concepts by Kids Can Talk LLC: \$5.99. Great simple app to work on placing objects in, between, near, into, beside, left, right, on/off, below/above, on top, ect...in functional scenes (bathroom, living room, garage, and kitchen). Great for preschoolers!

Magical Concepts by Virtual Speech Center: \$19.99. This app is designed to target the following concepts in a fun way: Spatial (location), temporal (time), quantity (number), quality (description), and social-emotional (feelings). The concept is presented and the student has to select the corresponding picture. Ability to store and track multiple uses (tailor the concepts you present to each child). Over 60 concepts to choose from!

AAC Apps

Expressive by Smarty Ears \$25.99. This is an affordable AAC voice output option. It comes with pre-loaded Smarty Symbols, and you can add your own audio and images. I use this occasionally as a trial AAC app. The voice is not synthesized if you add your own images the audio will be different.

Proloquo2Go by Assistive ware: \$189.99 I have used this with several patients for a voice output solution. Awesome, High Quality App! This is a full featured AAC solution! High quality design that is comparable to expensive devices. Many choices for voice output and completely customizable. It comes preloaded with core and basic vocabulary boards.

Custom Boards Premium by Smarty Ears: 59.99 An app that allows you to make communication boards with over 11,000 symbols included. Smarty Ears uses Smarty Symbols their own unique pictures. I like using Boardmaker symbols, but I do use this app often!

iCommunicate by Grembe Inc: \$49.99 This app has the ability to make visual schedules, storyboards, communication boards, routines, flash cards, choice boards, and more. It is customizable to your needs with voice output and over 10,000 pics.

First/Then Visual Schedule by Good Karma Apps: \$9.99. Great for kids who need positive behavior supports and/or have communication impairments. You can show the child what needs to be done before the next activity can begin! Love

So Much 2 Say by Close to Home Apps \$24.99. This is great affordable AAC app that is customizable and simple to use. Add your own images and voice output.

Talk Tablet Neo by Gus Communications \$79.99 Another great fully functional voice output AAC option! I don't personally have this one but have heard it is comparable to Proloquo2go and is more affordable. Check out their features on their website!

TalkBoard by Mashley Apps: \$16.99. TalkBoard turns your iPad, iPhone and iPod Touch into a communication aid and visual prompt board. Simple to add pictures and audio. Store and create multiple boards for multiple users. Also see PicBoard by Mashley Apps.

TouchChat by Silver Kite: \$149.99 AAC app that is fully featured with voice synthesizer. Comparable to expensive devices. (I do not own this but have read a lot about it.)

My Choice Board by Good Karma Apps: \$9.99 Ability to make visual boards for choices. Student can touch their choice. Great for non-verbal or kids with limited speech. Love this for therapy choices!

Lamp by Prentke Romich \$299.99 A PRC Unity® language system with Language Acquisition through Motor Planning (LAMP™) principles and strategies. I don't own this one yet!

Pictello by Assistive ware: \$18.99 This app is a simple way to make a talking photo album personalized to you students!

Language Lab: Core Words By Prentke Romich Company: FREE! Teaches core vocabulary to AAC or lang. delayed kids!

More AAC Apps:
iRewards by Grembe Apps
Grace App by Steven Troughton-Smith: \$24.99
TaptoTalk by Assistixx LLC: FREE Sample
My Pictures Talk by Grembe Inc: \$4.99

- ◆ **Social Quest** by Smarty Ears \$19.99 This app incorporates narratives about real-world situations in the home, school and community along with questions designed to increase positive social communication.

- ◆ **Tell A Story with Tommy: Community Sequences/School Sequences/Consequences** (3 apps) by Listen.Talk.Draw LLC \$2.99-\$6.99 each.

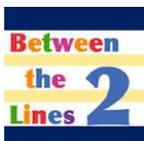

These apps are cute stories with a sequencing task at the end. The sequence set develops vocabulary, grammar, story telling, sequencing, and more using real situations therefore stimulating language development for all children. These are very cute and a must have!

Social Skills/Pragmatics

The Social Express \$89.99 Animated app that targets social skills. Potential benefits include the ability to: Identify feelings in others, Understand the importance of "eye contact" (thinking with your eyes) in order to figure out what to say or do in social situations, Read non-verbal social cues, Identify appropriate coping strategies, Learn how to start conversations, Learn how to be part of a group, Learn about the hidden rules in social situations, Sequence situations and infer what will come next, and many more. Create user profiles and print certificates!

Between the Lines by Hamaguchi Apps \$15.99 There are different levels of this app available for different age groups. Learn with real videos how to read body language/facial expressions and understand figurative language. Great for pragmatic language! I recommend getting all of them!

A Day with WH Words/Emotions and Feelings by Touch Autism \$2.99. A simple social story that visually reinforces WH questions. Cute! They have many social story apps.

iGet it Apps. This developer has many apps to help boost cognitive and language skills with the use of real pictures. They have an identification series and a sequencing series.

Creative Genius on the Go by Imagination \$0.99 and **Spark by Spark Your Imagination Ventures** \$.99 Great tool for groups. Open ended, convo starters! They provide fun prompts to get convos going!

Social Skills Sampler HD by Conover Company: Free This app has video examples of different social situations, The videos are short and simple with older kids in them.

Conversation Builder \$9.99 and **Conversation Builder Teen** By Mobile Education Store: \$29.99 These app s are designed to help students learn how to have multi-exchange conversations. The teen version deals with more mature topics tailored for high school students. They will learn to initiate, sustain, and end a conversation appropriately.

Practicing Pragmatics By Super Duper: \$5.99. Another card deck made into an app. This deck has audio (it will read the prompt out loud) and simple data tracking. This is great for elementary students and I use it while playing games before each turn.

Medical/Adult Apps

I work in nursing homes and rehab facilities from time to time PRN to keep up my medical skills. These are a few apps I have found useful. Tactus Therapy has a great adult app list! Find it here: <http://tactustherapy.com/resources/>

Language Therapy by Tactus Therapy Solutions . \$59.99 4 Apps in One! This app is combo of Comprehension Therapy, Naming Therapy, Reading Therapy, and Writing Therapy. These are excellent to use with adults and kids. The same core functional vocabulary organized by category runs across these 2 receptive and 2 expressive apps. Built-in cues, hierarchies, languages, and customization options . A definite must have for every SLP regardless of setting!

Word Retrieval by Virtual Speech Center \$9.99 This app uses confrontational naming, associations, and divergent/ convergent naming to improve their abilities to access already known words and increase their retrieval of words. Game play is set up to look like jeopardy game. Great for adults or older children.

Reading Rehab. Toolbox by Smarty Ears \$9.99 Targets improving reading skills for adults with reading difficulties. The Reading Rehabilitation Toolkit integrates six state-of-the-art reading activities at the word and phrase levels all specifically crafted to promote success in reading rehabilitation:

TalkPath Listening by Lingraphica Free Trials \$27.99 for complete app. This app is great! It covers object ID, opposites, common pairs, yes/no questions, wh questions, and following directions.

Category Therapy by Tactus Therapy Solutions \$14.99 A comprehensive app to target this language therapy for adults and children. Three levels: Concrete Categories, Subcategories, & Abstract Categories in four activities (find, classify, add one, exclude). Can't go wrong with Tactus Apps!

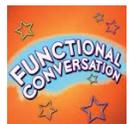

Spaced Retrieval Therapy by Tactus Therapy Solutions. \$3.99. This app is designed to improve memory and recall skills. You choose the stimuli you want recalled and place it on a timer for you to ask again (2, 4, 8, min). This app will help you keep track of 3 memory tasks at once and remind you when to ask again. Great App!

Dysphagia2Go by Smarty Ears \$59.99 This is a full assessment app to evaluate swallowing. It makes the process simple with almost every part of an assessment covered. Also goes into recommendations (diets, strategies, ect..). You can make notes throughout and email reports.

iName it by Smarty Ears. \$14.99 This app targets naming skills of items found in the home, it contextualizes the item within the room (the item is highlighted in the picture of the room it is found it. Gives a cueing hierarchy. Easy to use and it includes data tracking.

Functional Conversations by Linguistics \$24.99 This app addresses the improvement of conversation skills for older students and adults who have a variety of disorders including autism, aphasia, social language, auditory processing, and expressive language.

Problem Solving/Thinking Games

Pictureka by Electronic Arts \$4.99 This is a great thinking game and a good way to give the brain some exercise. You have to think quick and find objects from different categories in a scene before the time runs out!

SpongeBob Marbles and Sliders by Nickelodeon: \$2.99 Another fun problem solving game that you can have students work together to solve. Very well made with great graphics and many different levels.

The Game of Life by Electronic Arts: \$6.99. Just like the board game but portable! I like this game for older students to work on social skills, life skills, problem solving, turn taking, and more. Cute animations and graphics!

Scrabble by Electronic Arts: \$9.99. The original game on the iPad! I play this with older students, they have to make a sentence with each word they make and combine them into a story! Fun app!

More Fun Apps

Some of these apps have educational value and some are just for fun. You can use as motivators or therapy prizes.. Be creative and have fun with them!

Air Hockey by Acceleroto: \$0.99 This app turns your iPad into an , air hockey table! Super fun and a good reward for working hard in therapy!

My Underwear by Thumb Arcade: \$0.99 Super silly game with 4 game modes: Create your own underwear, memory matching, underwear match and feed the monsters underwear! Kids think this is hilarious!

Teach Me Apps by 22X7 Digital (Toddler-3rd Grade). \$0.99 Great app for teaching grade level skills. The students are rewarded with stickers (they have to earn coins and buy them!). Great visuals for learning!

Toddler Activity Farm and Bumble's Jumble by EduGame \$0.99-\$1.99. Explore the farm and learn animals by touching. Put together simple puzzles with Bumble's Jumble!

Swapsies and AlphaTots by Spinlight Studios. \$1.99 Super creative apps! AlphaTots teaches the alphabet (letters and sounds) and has a fun task for each letter associated with the verb. (Add candles to the cake, kick the ball, ect..) Swapsies is designed to teach occupations. Dress them up and play

iSinkU by Artificial Life Inc: \$0.99 iPad version of battle ship! Great for turn taking! Played just like the original battle ship game! Great graphics and sound effects! Boys love this game!

iFishPond by John Moffett: \$0.99 This is a fun soothing app (soft sounds of water trickling) with fun little features like feeding the coy fish (and catching them) adding frogs that jump on lily pads, ect..

Create-A-Car by ABCya: \$0.99. Great App! Build a car (many templates to start with) add engines, tires, accessories, and other fun and wacky things! After you finish you get to save them to a garage and turn the key to watch them go! Good for vocabulary!

Art of Glow By Natenai Ariyatrakool: FREE Fun soothing app, glow draw with your fingertips!

Pirate ScribbleBeard by Kidoodle Apps \$2.99. The kids get to draw and see their pirate artwork come to life! Great app and can be used for listening skills or a reward!

More Fun Apps: **BopIt** by EA \$0.99, **Crazy Copy** by Brain Counts: FREE, **Skee-Ball** by Freeverse: FREE **Word to Word** FREE with add on packs for sale. Great for Word Associations (higher level vocabulary). **Apples and Pears** by Boluga FREE. Great matching games for working on Synonyms and Antonyms. **iTouch Language Arts Apps** \$4.99 Great language arts content by grade level.

Digital Story Books

These apps are great interactive books that my students love!

Speech with Milo Interactive Storybook by Doonan Speech Therapy \$1.99. A great simple story developed by a SLP to target early language and literacy skills. Great touch interaction to keep your child interested! Same great characters from other Milo apps!!

Monster at the End of this Book (1&2) by Sesame Street: \$2.99 each. These are great interactive stories that highlight the text as it reads. There are many simple challenges throughout (undoing knots, knocking down walls, cleaning off glue ect...). The kids really get into these books! Good for language expansion, following directions, and listening skills! I love these books!

Sandra Boynton Books: **Blue Hat Green Hat, Moo Baa, La La La** by Loud Crow Interactive Inc: \$3.99 each. I love the originals and this app has a board book feel to them (the pages turn to look like thick boards). They are very interactive with hidden surprises to touch and discover on each page. You can read it yourself or have it read aloud by a great narrator! Packed full of funny sounds that kids love! This app is great for language delayed children. She also has **The Going to Bed Book** available.

Dr. Seuss Books by Ocean House Media: \$1.99-3.99

Dr. Seuss ABCs, Hop on Pop, Cat in the Hat, 1 Fish 2 Fish

We all know how wonderful Dr. Seuss books are for their repetitive, rhyming, alliterative and entertaining value! Its great to have these books on my iPad in an interactive format. There are 3 different settings: read to me, read, and auto play. I use these in therapy for phonological processing, articulation reinforcement, language development/ expansion, ect.. They have many more titles and I own many of them!

Guess Who by NCSoft \$2.99. Very cute book geared at little ones! The language is targeted at early talkers! Cute little things for the kids to tap and explore! Includes videos and games at the end.

Zanny Born to Run and Little Lilly's Touch Book by Extra Special Kids, LLC:

\$2.99each **Zanny**: Great little interactive book about a boy who can't stop! Bonus game at the end where you match faces to emotions (drag the correct face onto the head after an emotion is named). Kids really like this one! **Lilly**; This book is about a girl with sensory issues and how she deals with them.

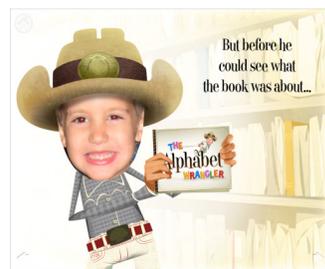

Chuck and Friends: Friends for the Long Haul by Ruckus Media Group: \$3.99 This is a great book with a variety of touch activities and videos throughout! What I really like about this app from a therapist's perspective is that it has comprehension questions throughout the story. The questions are featured in mini-games requiring the kids to uncover hidden letters and spell out the answer! Little boys really love this app!

Ruckus Readers by Ruckus Media Group: This company had developed iReaders (each comes with a free book and then you can subscribe to get all in the series). Target: Book Concepts, Alphabetic Knowledge, Phonological Awareness, Phonics, and Word Recognition. Great new product! You can track reading progress with this system! Check it out ruckusreader.com.

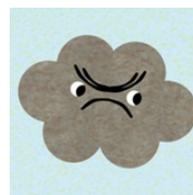

Starring You StoryBots by JibJab Media Inc. FREE. This book app comes with one free book and then you have the option of buying books individually for \$7.99 or subscribe to a monthly book for \$3.99/month. These books are AMAZING! You get to put the kids' face into the book and while you are reading it, their head is animated doing silly things on each page! The kids really love seeing their face on a scuba diver, cowboy, truck driver, mad scientist, and many more! I look forward to getting my new book every month and so do my students! (see the example on the right of my son as the Alphabet Wrangler! —>)

A Day with A Difference by Unit 11 \$1.99. Cute story that teaches basic concepts throughout with little challenges for the children to complete. (Concepts: Big/little, short/long, more/less ect...). It includes sorting and matching tasks. Bonus games at the end. Very well thought out app! (Currently has British accent).

Miss Spider books by Callaway Digital: \$3.99 Super cute stories with puzzles, coloring pages, and videos included! Great quality and price!

The Grouchies by The American Psychological Association: FREE Simple book (no narration or interaction) that helps kids get over being grouchy with a silly story with a lot of rhyming and repetition!

More Great Story books: Check out Disney Publishing Worldwide Applications for titles with kids' favorite characters: **Toy Story (1, 2, 3)** **My Little Pony**, **Cars**, **Don't Let the Pigeon** Books, and many more! (\$1.99-4.99) Also check out Zuka Incorporated : **How to Train Your Dragon**, **Kung Fu Panda**, **The Smurfs**, and many more. (\$2.99) Most of the paid books come with interactive features and games. **The Great Noodle** by Grids Interactive is a funny story! (\$3.99) Ocean House Media has **Mercer Mayer** and **Berenstain Bears** books that are fun and interactive (\$0.99-\$1.99). **A Very Busy Week** by 123 Number Fun \$1.99 is really neat with a lot of interaction and hidden surprises!

Animalia by AppBooks: \$2.99 Great alliterative story with amazing illustrations. It includes three different games: **Explore Animalia**-a seek and find game, **Go Get Graeme**-a hide and seek game, and **What in the World?**- a mystery shape game! Zoomable pages!

SLP Reference/Handy Tools

Age Calculator By SuperDuper: FREE and **Chronological Age** by Smarty Ears FREE. These apps are handy when doing evaluations to calculate the age of the child in years and months quick!

SLP Goal Bank By Smarty Ears: \$14.99 This has a bank of speech therapy goals for children and adults. It has the capabilities to store clients and attach goals to them. I use it just as a reference

Caseload Tracker By Smarty Ears: \$14.99. This app allows you to enter your whole caseload and track their IEPs, ARDs, Evaluation Dates, ect... This can be handy because it has color coded alerts to remind you when meetings or reports are due. It has built in security to protect confidential data.

Make Dice by hnm: \$0.99 This app is very simple but cool! It allows you to create a customized 6 sided dice. I

Coin Flip Free by iHandySoft Inc: FREE This is a fun simple app to do digital coin tosses!

Geek SLP by Smarty Ears: FREE This app is a blog by Barbara Fernandez with Smarty Ears. (App allows you to view posts from the website GeekSLP.com right on your iPad).

Assessments/Evaluations

Articulation Screener by Pocket SLP. There is a full and basic screen included. This is a quick way to assess articulation and track phonological processes. It generates a report that compares the phonemes to normal acquisition age.

AAC Genie by Hump Software \$9.99 An informal diagnostic tool that is intended to assist SLPs and others with identifying skill areas that relate specifically to the language representation methods commonly found on AAC systems. The purpose this app is not to identify a particular speech generating device, but rather build a framework for selecting an appropriate augmentative communication device for ongoing evaluation and / or device

Receptive Language Assessment by The Speech and Language Store \$24.99. This tests comprehension of a variety of word types, at four different levels of complexity.

Vocabulary Tracker Pro by Generate Learning \$6.99. This could be useful during language samples. You type in the student utterances and it calculates the number of words used, (unintelligible/intelligible) their phrase/sentence length (only words) (You can transcribe mis-articulated words (not in IPA) and keep track of the child's lexicon! Neat!

Sunny Articulation Test by Smarty Ears: \$59.99 This is a great tool to use for articulation screening or to show progress. It has 2 modes (test/screen) and it generates a great report. They also make a bilingual app **BAPA (Bilingual Articulation Phonology Assessment)** \$49.99. This is great because you can test English or Spanish and choose dialects. They are currently standardizing BAPA also!

AT2GO by Smarty Ears \$39.99 this app is designed to help you document all observations and considerations essential to an assistive technology evaluation.

Profile of Phonological Awareness by Smarty Ears \$49.99. A assessment/screening tool to quickly evaluate phonological processing skills. Automatic analyses of the following skill areas: 1. Rhyming - Identification and production 2. Blending - Syllables and sounds in words 3. Isolating - First, last, and middle sounds 4. Segmenting - Words, syllables, and sounds 5. Deleting - Syllables and the first sound in words 6. Substituting - First and last sound in words

Common Core Early Language Screener by Smarty Ears \$24.99 This app was designed to identify weaknesses in early language skills. it was based on the common core expectations for kindergartners; however, the screener can be used for other groups if needed.

LAT Articulation Test by Linguisticsystems \$99.99 The only standardized iPad articulation test. Comparable to the Goldman-Fristoe but cheaper! They have a paper copy available too.

*Email me at pandaspeech@gmail.com if you have any questions about the apps I listed or would like more information of how I use them in therapy. Always look up apps n iTunes and read reviews before you purchase them! (and then review them yourself!) Please remember if you store student data you **MUST** put a password lock on your device to protect confidential information! (App prices are subject to change per developer!)
